HATSAN.COM.TR

Serious. Solid. Impact

THE HATSAN DIFFERENCE

More Power

Even though velocity rates may appear the same from brand to brand, in most instances that is not the case. Hatsan establishes its velocity rating using heavier lead pellets, while most competitors use lighter aluminum pellets to market their velocities. What this means for you is that a Hatsan airgun delivers **OVER 30% MORE IMPACT ENERGY** than an alloy-tested airgun with the same velocity.

Unique Features

Many of our airguns offer specialty features that come standard within our product line to provide shooters with a better experience, including the Quattro Trigger, SAS-Shock Absorber System, QuietEnergy, XRS – Recoil Reduction System, Barrel Release System, TruGlo® fiber optics, the Triopad® butt system, patented “Antidouble pellet feed mechanism” preventing more than one pellet loading into barrel and “anti-knock system” preventing gas wastage when rifle is knocked or bounced.

What sets Hatsan Airguns apart from The Competition?

Custom Designs

While other manufacturers work from widely used templates, all Hatsan designs are conceived and developed in-house. This means your Hatsan airgun is an original, not a reproduction.

100% Vertically Integrated

Complete vertical integration ensures the high quality you expect from Hatsan. Every part of every airgun is produced right in our facilities to guarantee a wellmade finished product. And only the highest-grade raw materials are used, including fine Turkish walnut and durable German steel.

Family Ownership

It all started in 1976 with one young man hoping to replicate an air dart gun in his parents' garage. Since that time, Hatsan has become one of the world's most recognized brands in the shooting sports, airgun and firearm industry – delivering its products to more than 95 countries. This family owned and operated manufacturer maintains a hands - on approach - producing all designs and components in - house to ensure that each product deserves to bear the Hatsan name. In fact, the original founder is still very involved in new product development and design.

HYDRA

Multi-Caliber

**FULLY SHROUDED
BARREL**

Hydra's patented Versi-Cal Technology (VCT) system couples a caliber-specific receiver and barrel into a single interchangeable module. It allows for quick and simple multi caliber interchangeability. Unscrew the convenient upper receiver bolt to switch between .177, .22, or .25 caliber variants. This allows a scope to remain mounted and zeroed with each caliber barrel/receiver module, eliminating the need to re-zero each time the barrel is interchanged.
(*Additional caliber-specific barrel/receiver modules are available separately.)

Multi caliber interchangeable, multi-shot, bolt action pre-charged pneumatic (PCP) air rifle.

- Genuine Turkish walnut ambidextrous & ergonomic stock with Monte Carlo cheek piece.
- Checkering on grip & forend for better control & feel.
- Elevation and fit angle adjustable rubber butt pad.

HATSAN BLITZ HIGH CAPACITY MAGAZINE

MAGAZINES AND PELLETS

10-SHOT MAGAZINE

- Easily mounts to all AT44 & BT65 10-shot PCP series air rifles.
- Light in weight and made of aluminum.
- Spare 10-shot magazines are available in .177 (4.5mm) and .22 (5.5mm) calibers.
- Spare 9-shot magazines are available in .25 (6.35mm) caliber

GALATIAN MAGAZINE

Spare magazines for Galatian PCP air rifles are available in 16 shot in .177 (4.5mm), 14 shot in .22 (5.5mm) and 13 shot in .25 (6.35mm) caliber.

BLITZ & FACTOR MAGAZINE

21-shot magazine in .22 (5.5mm), 19-shot magazine in .25 (6.35mm) and 16-shot magazine in .30 (7.62mm) caliber

SPEED MAG LOADER

Speed mag loader can be used with Blitz magazines.

HIGH CAPACITY MAGAZINE

High capacity magazine can be used in all Factor models.

HATSAN POINTED HEAD PELLETS

High performance, accurate and precise for pest control and precision shooting at larger distances. Pointed head & waisted design lead pellets providing maximum penetration on the target. Recommended to use on Hatsan products.

Hatsan pointed head pellets are available in .177 (4.5mm), .22 (5.5mm) and .25 (6.35mm) calibers.

- .177 (4.5mm) caliber Hatsan pointed head pellets. 200 pellets per tin.
- Weight: 0.545grams / 8.41grains.

- .22 (5.5mm) caliber Hatsan pointed head pellets. 300 pellets per tin.
- Weight: 0.910 grams / 14grains.

- .25 (6.35mm) caliber Hatsan pointed head pellets. 200 pellets per tin.
- Weight: 1,61grams / 24,85 grains.

Serious. Solid. Impact

PCP ACCESSORIES

SOUND MODERATOR

- Reduces the sound significantly.
- ½" UNF threaded and easily mountable on the muzzle.
- Made of aluminum alloy and light in weight.

EXTENDED MUZZLE BREAK

- Extended & ported muzzle break for a different look.
- ½" UNF threaded and easily mountable on the muzzle.

AIR STRIPPER

Air stripper helps to get better accuracy and grouping by decreasing the air turbulence at the muzzle as the pellet leaves the muzzle.

HATSAN PCP BAG

Special design bag fitting all Hatsan PCP air rifles. Made of quality and waterproof material and can carry your air rifle with scope mounted.

HATSAN HAND PUMP

- The most convenient and affordable way to charge your PCP air rifle.
- Maximum 200 bar fill pressure.
- Ergonomically designed handle with synthetic cover.
- Built-in moisture trap embedded in the handle which traps the moisture and protects your pump & air rifle.
- Built-in particle filter embedded in the handle which traps the dust & dirt and protects your pump & air rifle.
- Additional compartment in the other handle where you can put spare parts and O-rings of the pump or small belongings.
- Built-in precise pressure gauge embedded in the frame which protects it from external impacts.
- Easily demountable design.
- Specialist design wide foot plate with adjustable pumping angle.
- Comes with hose and connector.

AIR TUBE CYLINDER

- Detachable air cylinder
- Maximum fill pressure 200 bar.
- Easily screws in to the all Hatsan AT44 PCP series air rifles.
- Possibility of refilling the air tube while on the rifle or detached.

HATSAN CHARGING KIT

Designed to fill air into the air cylinder of your PCP from scuba tanks. The quickest method to fill your PCP.

HATSAN PLASTIC CASE

Designed for Hatsan PCP air rifles.

Foregrip with expandable bipod

UNIQUE FEATURES FROM HATSAN

Quattro Trigger

This advanced two-stage match trigger is only available from Hatsan. It offers three-point adjustment to control the trigger load, the position of the first and second stages of the firing cycle, and the length of trigger travel—all while maintaining full sear engagement. The custom trigger also allows you to release finger pressure if the shot cannot be taken after engaging in the first stage of the firing cycle, automatically returning the trigger to full engagement. And a drop safety interlock device has been incorporated to eliminate the possibility of the airgun accidentally firing if it's dropped (whether or not the safety is on).

The proprietary Shock Absorber System reduces vibration and increases the life of the gun, optics, and accessories.

TRUGLO Fiber Optics

Fiber-optic technology has been integrated into a microadjustable rear sight and front sight to lend more accuracy to your shot.

QuietEnergy Sound moderator in fully shrouded barrel for reduced down-range noise—Approximately 50% Quieter.

XRS - Recoil Reduction System

Hatsan air pistols are equipped with Hatsan's "XRS-Recoil Reduction System" for a noticeably smooth shot. Recoil is absorbed during the shot by the design of the sliding action. This makes for a more accurate and comfortable shooting experience.

TRIOPAD® Butt System

Maximum recoil absorption provides added comfort, and three stock spacers allow adjustments for appropriate length of pull.

VORTEX

WHY HATSAN VORTEX GAS PISTONS?

Unlike our competitors, Hatsan Vortex Gas Pistons technology is developed and manufactured by Hatsan to be specifically used in most Hatsan Break Barrel and Under Lever airguns. Hatsan Vortex Gas Pistons utilize regular air instead of any other type of gas. Hatsan offers 6 different types of Hatsan Vortex Gas Pistons – encompassing the majority of Hatsan's line of Break Barrel and Underlever spring action guns. The following models are offered:

Type 1 : Mod 55-60-70-75-80-85-90

Type 1-B : Mod 88-95-99

Type 2 : Mod 125-125TH-125 Sniper-135 -Torpedo 150-150TH-155

Type 3 : Striker 1000S-1000X-Edge

Type 4 : Dominator under lever series

Type 5 : Torpedo 100X-105X under lever series

Type 6 : Mod 25 SuperCharger / SuperTact

Type 7 : Proxima

Benefits of Gas Piston Airguns

- Gas piston powered airguns can remain cocked for long periods of time without causing any spring stress or damage to the gun.
- Gas piston powered airguns produce more steady and consistent power between consecutive shots versus spring powered airguns.
- Gas Piston powered airguns eliminate most of the vibration caused by the oscillation of the heavy springs used in spring powered airguns. Gas Piston models oscillate much less and finish the action cycle in less time than spring powered models making for a more comfortable confident shooting experience.
- Gas piston powered airguns' lifecycle is significantly greater than its spring action counterparts. There is no risk of spring fatigue or spring breakage. Fewer moving parts result in a much more efficient and reliable operating system.
- Gas piston powered airguns provide higher, consistent velocities over their lifetime when compared to spring action models. Springs get weaker over time causing decreases in velocity.
- Gas piston powered airguns provide a much smoother and quieter shooting experience than their spring action counterparts. With gas powered models, the cocking action is much smoother. Also, spring grinding noises are eliminated during the cocking and firing sequence.

- More steady and consistent power between consecutive shots.
- Eliminates most vibration caused by oscillation of heavy springs.
- Much smoother and quieter shooting experience.

MOD 125

TRIOPAD® Butt System
The Hatsan TRIOPAD® Butt System utilizes a heavy duty rubber recoil pad and 3 stock spacers. This allows for maximum recoil absorption and up to 4 different length of pull options.

* Above maximum muzzle velocity figures may differ depending on the pellet weight & shape.

* The energy restrictions of a particular country can be achieved by the reduction in the muzzle velocity. The above maximum velocity figures are obtained when there is no energy restriction on the air rifle.

ACCESSORIES

OPTIMA PROTECTOR SCOPE MOUNT

- Eliminates almost all recoil force on the rifle scopes and hence provides repeated accuracy.
- Suitable with 1" (25.4mm) tube diameter rifles scopes.
- Fits 11mm dovetail. 22mm picatinny rail version is available.
- 4 screws per ring secure optics and 3 screws fasten the base of the mount. Includes hex wrench.
- Vertical scope stop pin.
- Dimensions (L x H x W): 120 x 50 x 40mm.
- Weight: 205grams.
- Material: Aluminum.

OPTIMA LONG RANGE SCOPE MOUNT

- Elevation and angle adjustable rings provides more setting needed for long range accuracy.
- 0.16" (4.0mm) elevation adjustable and +/- 1.5 degrees angle adjustable.
- Suitable with 30mm tube diameter rifles scopes.
- Fits 22mm picatinny rails. 11mm dovetail version is available.
- Weight (of 2 rings): 126grams.
- Material: Aluminum.

HATSAN SLING

AIR RIFLE PELLET CATCHER

- Designed to use with Hatsan Air Rifles.
- Special design which traps the pellets and lever lets them out...
- Superb-all-steel construction.
- Galvanized finish assuring durability and total protection against corrosion.
- Comes in its box with 20 pieces Hatsan targets.
- Suitable for shooting with all Hatsan air guns with velocities even up to 1250 fps (375 m/s).
- Intended for use with lead air-gun pellets. Steel BBs should never be used with pellet catchers because of danger of ricochets.

HATSAN AIR RIFLE BAG

Special design air rifle bag fitting all Hatsan air rifles. Made of quality and waterproof material and can carry your air rifle with scope mounted.

AIR PISTOL PELLET CATCHER

HATSAN BIPOD

Designed to use with Hatsan Air Pistol.

HATSAN TARGETS

Hatsan Target #1 for short distance shots

- Designed to use with Hatsan pellet catchers.
- Worldwide considered shooting target dimensions. Supplied in 100 pieces packages: 50pcs target #1 & 50pcs target #2

Hatsan Target #2 for long distance shots
